

Please amend this application as follows:

In the Specification:

Please replace the Abstract with the following (the changes on these paragraphs are shown with ~~strikethrough~~ for deleted matter and underlines for added matter). A separate sheet is being submitted pursuant to 37 CFR 1.72:

~~An automatic fluid soap dispensing apparatus and method comprising a dispensing spout, housing operatively connected to the dispensing spout and the housing adapted to removably receive and hold a fluid soap containing reservoir module in communication with the dispensing spout. The reservoir module has a central axis, and includes a pump mechanism and delivery tube mounted on the reservoir module in alignment with the central axis. The dispensing tube is adapted to move in the dispensing spout when the pump mechanism is actuated.~~

A method of dispensing soap from a fluid dispensing system is disclosed. The method includes the steps of presenting a tube having a tube end disposed at a first position within an indented portion of a spout of the fluid dispensing system, sensing an object below the tube end, in response to sensing the object, expelling said soap from the tube end by drawing the tube end further within the indented portion to a second position, and returning the tube end to the first position.
